UI Design Using RAD Model for Online Clothing store

AIM:

To simulate the lifecycle stages of UI design using the RAD (Rapid Application Development) model and develop an interactive online clothing store prototype.

INTRODUCTION:

PHASE 1: REQUIREMENTS PLANNING

Identify Key Features / Navigation:

- **Home Screen (Login / Register)**
- **Cloth Gallery**
- **Cart Screen**
- **Check Out screen**

User Actions:

- Register / Login
- Browse cloths
- Open Cart
- Make payment
- Track order
- Give review / rating

Functional Requirements:

- User can register and login
- User can browse cloths
- User can add items to cart
- System allows order placement
- System processes payment
- User can track order status
- User can give feedback

PHASE 2: USER DESIGN

Tool Used:

Axure RP

Wireframes Designed:

- **Login / Signup Screen**
- **Home Screen**
- **Cart Screen**
- **Payment Screen**
- **Interactions Implemented:**
- **OnClick navigation between screens**
- **Button hover effects**
- **Smooth page transitions**

RESULT:

Thus, the Online clothing Store was successfully designed and developed using the RAD model. The prototype demonstrates an interactive and user-Online clothing store.
